Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 22, 2005 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 14, 15, 17, 18, 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 3903438 A1 (the Examiner found a different embodiment).

DE 3903438 A1 discloses a femoral insert made of biocompatible material (see Fig. 2, elements f & g). The insert discloses a stem (77), a distal portion (see marks in attachment) having an arcuate configuration, a proximal portion and a distal portion (see attachment). As shown in attachment, the stem has a medial surface and a lateral surface. As shown in attachment, the stem has a plurality of radii. The first radius is substantially equal to the second radius. The radii of the lateral surface and the medial surface substantially converge along the distal portion so as to form a substantially arcuate configuration tangential to the proximal portion and the implant has a trunnion portion. Finally, the proximal portion is substantially

straight and the distal portion of the member curves towards the medial surface of the intramedullary canal.
